Submission form for the special session at ISPCS 2012.

Each submission must be limited to a single topic. A proposed revision may involve multiple clauses but should address a single technical objective, e.g. correcting an operational error in the protocol, adding a new mapping annex, removing an existing option, resolving a specific conflict with another standard.

1. Title: (should indicate the subject matter, e.g. Defining a mapping of IEEE-1588 to MPLS)
2. Author:
3. Affiliation:
4. Date of submission:
5. Clause(s) of IEEE 1588-2008 (V2) proposed for revision:
6. Character of the proposed revision: (select from A-clarification no change in function, B-correction of error in V2, C-new feature not present in V2, D-removal of existing feature in V2, E-other)
7. Reason or rational for the proposed revision.
8. Proposed revision: (be specific enough so that readers know how the proposed technical changes affect the operation of the protocol)
9. Benefits of the proposed revision: (state if these benefits are realized primarily by a specific industry or application)
10. Backward compatibility to IEEE 1588-2008: (select from one of the following and add additional clarification if needed: A: Complete backward compatibility, i.e. V2 and the revised version interoperate although V2 devices do not receive benefits of revision, B: Backward compatibility with V2 EXCEPT for the functionality of optional clauses (list), C: Minor incompatibility with easy workaround , D: Incompatibility limited to specific configurations, E: Will not interoperate with V2)
